

Name: anti-CK19 mouse monoclonal antibody, clone UMAB2
Product Data Sheet - UltraMAB

Catalog: UM500002

Gene Name: Homo sapiens keratin 19 (KRT19)
GeneBank accession: NM_002276
Isotype: IgG1

Reactivity: Human
Test application: WB
Clone Name: Clone UMAB2

Gene Synonym: CK19; K19; K1CS

Guaranteed Applications: WB, IHC

Suggested Dilutions: WB 1:1000, IHC 1:50

Immunogen: Recombinant fragment expressed in E.coli corresponding to amino acids 240-390 of human CK19

Components:

- anti-CK19 mouse monoclonal antibody, clone UMAB2 (UM500002)

Amount:

UM500002 100ul

Concentration: 0.5~1.0 mg/ml (Lot Dependent)

Storage Condition: Shipped at 4C. Upon delivery store at -20C. Dilute in PBS (pH7.3) before use. Stable for 12 months from date of receipt. Avoid repeated freeze-thaws.

Buffer: PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.

Purification:

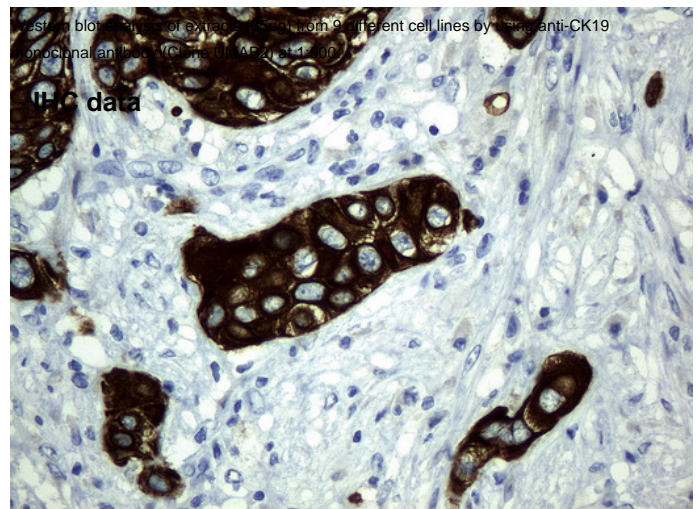

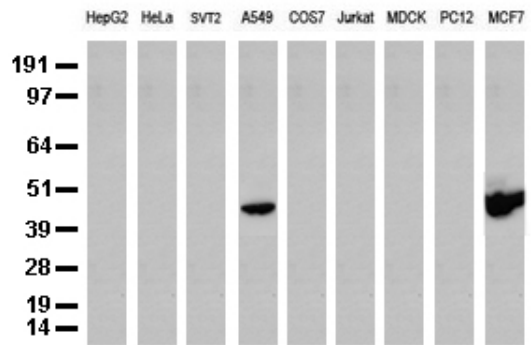

Purified from mouse ascites fluids by affinity chromatography

Background:

Keratin 19 is a member of the keratin family. The keratins are intermediate filament proteins responsible for the structural integrity of epithelial cells and are subdivided into cytokeratins and hair keratins. The type I cytokeratins consist of acidic proteins which are arranged in pairs of heterotypic keratin chains. Unlike its related family members, this smallest known acidic cytokeratin is not paired with a basic cytokeratin in epithelial cells. It is specifically expressed in the periderm, the transiently superficial layer that envelops the developing epidermis.

Validation Data:

Western Blot

Immunohistochemical staining of paraffin-embedded Carcinoma of bladder tissue using anti-KRT19 mouse monoclonal antibody. (Clone UMAB2, Dilution 1:100)
